May 24, 2018

Jefferey N. LeBeau, Jr., P.E. Town Engineer Town of East Hartford 740 Main Street East Hartford, CT 06108

Re: Freightliner

178-182 Roberts St. East Hartford, CT

Dear Mr. LeBeau:

I am writing to confirm that the referenced project will result in a reduction in impervious coverage and an improved stormwater quality discharge from the site.

The project includes the removal and replacement of an existing building and paved parking lot with new facilities. The existing site impervious coverage is 70,908 sf while the proposed is 68,238 sf. Existing drainage patterns and most of the existing drainage structures will remain.

Environment 21 V2B1 model 3 or equal stormwater treatment units will be utilized to further improve stormwater quality. Two units are proposed, one for the south paved area and one for the north area. There are 0.35 acres of impervious runoff to the south area and 0.55 acres of impervious for the north area. Both areas are piped to existing drainage structures along the west property line.

I believe this letter addresses the stormwater conditions for the site. Please call me if you have any questions.

Sincerely,

Børghesi Building and Engineering Company, Inc.

John Phillips, P.E. Senior Engineer
