

POLICY ON

WORKPLACE SAFETY

The Town of East Hartford has always been committed to providing its employees with the safest and healthiest working conditions. In order to safeguard employees, it is the town's policy to provide special equipment and to follow operational practices necessary to protect against particular hazards.

However, our efforts alone are not sufficient and only through the earnest cooperation of each employee can we safely accomplish our tasks. In order to be successful, observe all safety regulations and wear personal protective equipment provided. As well, as, report any potential hazards or conditions that may put our employees or citizens at risk, to the appropriate Department Head, Risk Manager or Safety Committee representative

Thank you for your anticipated cooperation and remember accidents can be prevented if we all work together to keep East Hartford safe for all citizens and employees.

Approved by Timothy M. Larson
Mayor of the Town of East Hartford
