ENGINEERING DIVISION

RULES PERTAINING TO EXCAVATION PERMITS

In consideration of the grant of an *Excavation Permit* by the Town of East Hartford, the licensed contractors agree to adhere to the following rules while carrying out the work detailed in its application for such permit:

1. The road(s) on or around the work area will not be closed to traffic at any time while the work is being carried out unless the permit was issued with an approved detour or closure to local traffic. Unless a detour is approved, at least one lane that is wide enough to permit the safe passage of all vehicles, shall be maintained fully open at all times.
2. Any and all portions of the road(s) or Town-owned properties disturbed by the applicant (and/or its agents, assigns, employees, contractor and/or sub-contractors) shall be speedily restored to their original condition in accordance with the Temporary Patch detail plan or as directed by the Director of Public Works or their approved agent.
3. In the event the Town is required to repair, alter or improve any temporary patch or patches installed by the applicant on Town roads, the applicant will reimburse the Town for all costs of such work.
4. Applicant will comply with all laws, ordinances, rules and regulations of the Town and/or State while carrying out the work detailed in its application and permit. Applicant agrees that it will promptly comply with any and all requests and/or orders related to such work issued by the Town.
5. The excavation permit shall become null and void if the work for which such permit has been issued is not commenced within thirty (30) calendar days from the date of issue. Any failure by the applicant, its agents, assigns, employees, contractors and/or sub-contractors to adhere to the preceding rules will result in immediate revocation of the excavation permit. In addition, such failure will result in denial by the Town of further excavation permits to the applicant.
6. Permits that are still in effect may be extended one time by notifying the Engineering Division. If the permit is allowed to expire or a second extension is required, an additional permit fee is required.
