SUBJECT: Council Resolution – Vaccine Equity and Access Program Grant
DATE: August 12, 2021

Attached is a draft Town Council resolution authorizing you as Mayor to apply to the United Way of Central and Northeastern Connecticut for a Vaccine Equity and Access Program Grant.

The United Way of Central and Northeastern Connecticut has received a \$100,000 grant from the Community Catalyst organization. The purpose of the grant is to develop vaccine confidence networks that enable individuals and families in communities of color to absorb accurate, timely, and culturally appropriate information about vaccine options.

The Town of East Hartford has the opportunity to enter into a subcontractor agreement with United Way to increase influenza and COVID-19 vaccination opportunities within the community and enhance provider relationships with the communities they serve. The East Hartford Health Department will partner with the United Way, the Latino Way, East Hartford Connects, and First Choice Health Centers to support vaccine education and outreach via trusted community messengers, and promote access to vaccinations for communities of color. Vaccine Equity and Access Program: Request for Proposals

PROGRAM AND FUNDING OPPORTUNITY DESCRIPTION

Community Catalyst is proud to announce the launch of our Vaccine Equity and Access Program, a national program that supports community-based organizations led by and working with people of color to facilitate information about, and access to, vaccines as part of a broader effort to reduce vaccination disparities, specifically in influenza and COVID-19 vaccination rates.

Background:

Vaccination is a highly effective public health intervention that, when accessible, prevents infection and the spread of illness, saving millions of lives every year. However, systemic racism has led to inequities that permeate health care, living and working conditions, and economic mobility across the country. As a result, there are significant health disparities between white people and people of color in the United States, including disparities in adult vaccination rates. In a health care context specifically, people of color have long-confronted injustices—both historical and present-day—that contribute to poorer health outcomes and inequitable access to care. These injustices include medical systems rooted in racialized violence and abuse, discriminatory treatment at the hands of medical providers, lack of research and information about health issues that disproportionately impact people of color, the targeted under-resourcing of communities of color, and services within health systems that do not support identified community needs or culturally competent care.

Over the last year, as the COVID-19 pandemic has gripped the nation and the world, the same racial inequities that have led to disparities in health care more broadly, including in vaccination rates, are leading to much higher rates of COVID-19 infection and death in communities of color, most especially in American Indian/Alaska Native, African American/Black, Asian American, Hispanic/Latinx American and Native Hawaiian and Pacific Islander communities.

Now that several vaccines for COVID-19 are available and vaccination is more urgent than ever, community leaders must be equipped to develop vaccine confidence networks that enable individuals and families to absorb accurate, timely, and culturally appropriate information about vaccine options, including information that addresses questions and concerns people may have. These networks can also be invaluable leaders in raising awareness about the need to improve both COVID-19 and influenza vaccination access points in communities of color and in connecting providers with information and resources to better meet the needs of the communities they serve in the long term. With funding provided by the Centers for Disease Control and Prevention, Community Catalyst's Vaccine Equity and Access Program will invest in approximately 75 community-based organizations led by and working with communities of color to:

- Equip influential messengers within the community to become ambassadors for COVID-19 and influenza vaccine information;

- Increase vaccination opportunities within the community and enhance provider relationships with the communities they serve; and
- Establish and/or build upon partnerships with state and local health departments to support vaccine access in both the short and long term

RE: BID WAIVER: Acquisition of Used Fire Apparatus

Please see the attached information provided by Fire Chief John Oates requesting that a bid waiver be granted under the Town of East Hartford's Code of Ordinances Section 10-7(c) to permit the purchase of a used fire apparatus in the amount of \$50,000.

The Town Council previously approved funds to purchase two new replacement fire apparatus. The Fire Department was notified that the delivery date for those units is over 400 days from the date of order, and determined that the purchase of a serviceable spare apparatus was needed to bridge that significant time frame. The apparatus in question was used by the Bradley International Airport Fire Department and was recently removed from service. An inspection of the apparatus found it to be in outstanding condition. Attached please find a transfer request as well, identifying the funds to be used for the acquisition and equipping this for service.

Please place this item on the Town Council agenda for the August 17, 2021 meeting. I recommend that the Town Council approve the bid waiver as submitted.

RE: Acquisition of used fire apparatus

Mayor,

Through your leadership, coupled with strong support from the Town Council, the community recently obligated substantial funds to purchase two replacement fire apparatus. We were recently notified that the delivery date for those units is over 400 days from date of order. While we look forward to that date, we continue to be concerned about the overall health and reliability of our emergency response fleet.

As we illustrated during the budget development process in November, several of our apparatus, particularly the spare units, suffer from significant corrosion damage. In the last week, a portion of the steel frame that holds the water tank in place on our primary spare fell apart, necessitating an emergency repair. It appears that one other apparatus may also need similar fabrication work. Our efforts to borrow serviceable apparatus from other communities has, occasionally, borne fruit. However, that is an unreliable method to ensure we can meet the service delivery demands of the community.

We evaluated the best course of action (extensive repair of our current spare apparatus vs replacement) and determined the purchase of a serviceable spare apparatus was a more fiscally responsible plan. Over the past week, the department solicited fire apparatus dealers and individual departments for availability. The intent was to gain a better understanding of availability, compatibility with our current fleet, as well as cost. During this process, a dealer from out of state called and stated that he had a low mileage used apparatus for sale. The apparatus in question was used by the Bradley International Airport Fire Department and was recently removed from service. A brief inspection of the apparatus found it to be in outstanding condition. A photo of that apparatus is included on the attached page.

I recommend acquisition of this apparatus and respectfully request your permission to address the Town Council and gain their approval. The two items that require their approval are a waiver of Section 10-7 (c) of the Town of East Hartford Code of Ordinances as well as a fund transfer (\$50,000) to support the purchase.

I appreciate your consideration of this concept and am available for any questions
